

# My Dream Job

Lau Hin Wang, Season (6D)

I will be a professional gamer one day.

To be a pro gamer, I need to have excellent gaming skills as well as advanced equipment. I need to acquire good teammates and good teamwork skills. I also need to be patient. My role model is every esports gamer. Not only they do put sweat and effort on competitions, they have earned my respect for that. Their personality is not all that serious. Sometimes, they like to joke around. It reminds me that esports isn't about the money. It is about having fun and making friends. Esports rivalry is just like two groups of babies fighting each other. It could be a laugh.

I want to be a pro gamer because I like gaming. I will train hard to become a pro gamer. No matter what it takes, I will try my best to become a pro gamer one day.
