9<sup>th</sup> September, 2021

I was absent from school last week because I had a fever and a runny nose. My mum put her hand on my head and checked my temperature. My mum told me to see a doctor but I was too sick to move. I had to force myself to move.

When I went to the clinic, I saw a lot of patients who were not wearing masks. The person sat next to me was sneezing a lot, so I moved to another seat.

When it was my turn, the doctor said, 'You have a cold. You need to take some medicine on time, take more rest and put on a warm blanket.'

A few days later, I felt much better. I could play and go to school!
